Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The finality of the last office action is removed since new prior art is being applied.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 1654

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6-9, 12, 13, 15-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Newmark et al. (US 6,391,346), see whole reference, especially, col. 4, cols 6-7.

Newmark teaches a carbon dioxide extract of hops which is in capsule, tablet, suspension, etc. forms. Newmark also teaches that additives such as those listed on col. 6 are also included with the hops extract. Germany is cited to show that beer has both sugars and vitamins.

Claims 1, 6, 9, 12, 13, 15, are rejected under 35 U.S.C. 102(b) as being anticipated by Panzner et al. (US 4,554,170), see whole document especially col. 1-2 or Panglisch, see abstract.

Panzner teaches a carbon dioxide extract of hops. The hops are in liquid form which would be an injectable solution. Panglisch teaches that a carbon dioxide extract of hops is used in making beer. Germany shows that beer contains sugars and vitamins as well.

Claim Rejections - 35 USC § 103

Art Unit: 1654

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 6-9, 12, 13, 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Panzner et al., Panglisch, or Newmark et al.

It would have been obvious to use the beer in such ratios of alpha acids to beta acids.
